MICROSOFT 365
SECURITY ASSESSMENT

The Microsoft 365 Security Assessment is designed to assess your tenant against the industry-standard CIS benchmarks, providing you with a clear understanding of your compliance status. By leveraging our expertise, you can identify potential vulnerabilities, establish a roadmap for remediation, and ensure the highest level of security for your organisation's Microsoft 365 tenant.

Conduct discovery call to agree objectives

Before starting any assessment, it's crucial to understand your business objectives and risk profile to ensure the assessment aligns to your requirements

01

Audit your Microsoft 365 environment

We will conduct a comprehensive analysis of your Microsoft 365 configurations, settings, and security controls using a combination of manual analysis and specialised tools.

02

Maximise your investment in Microsoft 365

Our security assessment provides enhanced visibility into Microsoft licensing, security posture, and solution usage to ensure you maximise your return on existing investments.

03

Roadmap

In partnership with you, we will build a roadmap inline with your organisations risk profile and can be on standby to assist with any remediation work.

04

The assessment covers the following technologies:

Microsoft

Entra AD   Exchange Online   SharePoint Online   OneDrive Online   Teams
